Good morning ——— ,

I am Sneha Singh currently pursuing B.Tech degree in CSCE from KIIT university wid a cgp of 8.42.

During my academic journey I took many projects, some of the key projects include, (A ~~comparative analysis of classifier for~~) skin disease Image classification ~~is~~.
In dis I implemented six diff pre trained M.L models on medical img dataset. I concluded that DenseNet 201 consistently outperformed others wid high accuracy and precision on medical dataset.

Apart from ML proj I worked on a Real time wheather app using Javascript and Bootstrap. I also contributed to d development of educational website focusing on Java err handling, employing Bootstrap, HTMS n CSS for effective learning exp.

I am passionate about end to end project management and user centric desgin, focusing on delivering effective and itutive solutions.

9. where do you see yourself after 5 years.

I see myself taking on more responsibilities and challenges. Imposing my skills to make a positive impact. I am eager to grow ~~within~~ the company, learning ^{would} from experiences & colleagues, & continously improving myself. My goal would be to become a valuable team member. I would love to be an industry expert that others can come to.

8. ~~D~~ independent or team

I believe in both independent & teamwork ~~to~~ but I tend to enjoy working in a team. Being part of team allows me to combine different perspective & skills which often leads to more creative effective soln. It also ~~allows~~ a great way to learn from others & share my own expertise. However I can work idependently when needed, I appericiate the balance between solo talk & collaborative project. Ultimately I'm adoptable & focused on contibuting positively to the team's sucess.

Persistent system company
